About the MAiHEALTH™ Pātea Pop Up Clinic

The **MAiHEALTH™ Pātea Pop Up Clinic** has been developed to increase access to health services for adults living in remote communities in the Far North. Coupled with the use of digital technologies, the **MAiHEALTH™ Pātea Pop Up Clinic** is an innovative form of health care.

We are offering free health checks to help prevent the complications caused by untreated health problems. With your consent, trained staff members will use the **MAiHEALTH™** digital equipment to collect health information about any conditions you may have.

The assessment includes recording some basic health measurements, such as height, weight, temperature and heart rate - all this is done using digital health devices. These measurements are important to ensure the health problem we are assessing is not serious enough to require an urgent assessment by a health professional.

Our staff will gather more information from you about the health condition you are presenting with. Often a photo is taken to give the **MAiHEALTH™** telehealth team a better idea of what treatment, if any, is needed.

Swabs are taken if you have a sore throat. This is a painless and simple test involving a cotton swab sweeping the back of the throat. This is important to determine if the serious infection **Strep Throat** is present.

Swabs are also taken if you have a weepy and infected looking wound. This is to ensure the most effective treatment can be initiated for you.

The information collected about you is entered into a unique file using the **MAiHEALTH™** digital application, which our staff members have on a smart device.

Once all the required information for your health condition has been collected, the information is sent through a secure connection to the **MAiHEALTH™** database.

The **MAiHEALTH™ App** is available for download on **Google Play** and the **App Store**. This will give you access to all the information collected about you. Once you have the **MAiHEALTH™ App** you will receive notifications about any updates to your file.

All information is accessible and monitored by the **MAiHEALTH™** telehealth team and used solely for the purpose of assessing and determining an appropriate treatment plan for your health care.

A Doctor is the only person who can make a decision about treatment for you. If you require treatment, you will be informed by a **MAiHEALTH™** staff member or by notification via the **MAiHEALTH™ App**.

If you do require treatment, you will be asked from where you would like to collect the treatment - either your local pharmacy or in some cases (depending on your local pharmacist) delivered to your door.

Frequently Asked Questions

There is no charge for using the **MAiHEALTH™ Pātea Pop Up Clinic**.

Who will be assessing me? A staff member who has been trained and assessed as competent to use the **MAiHEALTH™** technology.

What if I do not consent to being a part of the MAiHEALTH™ programme? You will not be assessed nor registered on the **MAiHEALTH™** database.

Does my family GP get informed about my being assessed and treated by the MAiHEALTH™ team? Yes. Everyone who is assessed by the **MAiHEALTH™** team has an electronic record of this interaction sent to their family GP. This ensures your family GP is involved and aware of the care being delivered to their patients.

Does this mean I have to register with the MAiHEALTH™ service for my primary health care needs? No. The **MAiHEALTH™** service does not replace your family GP and primary health care team, who are there to provide you and your family with comprehensive primary health services. The **MAiHEALTH™** service is designed to enhance this care rather than replace it.

If I have a dental infection, what happens next? We will arrange to have you assessed by a local dental service. Often dental infections occur when dental decay is present.

Does this cost me anything? Yes. Any person over the age of 13 years is required by our health system to pay a surcharge for medication.

Are photos taken of sensitive areas? No. Photos or videos will not be taken of you if your infection is on an area of the body deemed to be sensitive (e.g. genital and buttocks areas).

What are the skin conditions covered by the MAiHEALTH™ programme? The most common conditions are scabies; eczema; school sores; infected wounds and cellulitis.

Do skin infections spread? Yes. They spread very easily and are highly contagious if you live in a crowded home.

How serious are skin infections if not treated? Untreated skin infections can, in some cases, cause serious complications such as deep bone and joint infections, kidney damage and Rheumatic Fever.

Privacy Statement & Consumer Rights

The **MAiHEALTH™ Pātea Pop Up Clinic** provides this information to help you decide if you will benefit from the **MAiHEALTH™** programme. Discuss it with your whānau so you feel comfortable about making an informed choice for your health care needs.

Your privacy is important to us and will be protected at all times. Information will be collected about you for the purpose of providing health checks and registering you as a user of the **MAiHEALTH™** programme.

The information collected about you will include your name, age, medical history and information obtained as part of the health checks. This may also include photos of affected areas (except where affected areas are deemed a sensitive part of the body, e.g. genital, buttock areas); swabs; vital signs; and lab results.

The information we collect may come from you or from other healthcare providers (e.g. your family Doctor).

Information is recorded in the **MAiHEALTH™** database, which is managed through a third party service provider and may be stored overseas. The **MAiHEALTH™** database is accessible and monitored by our **MAiHEALTH™** telehealth team only. This means only authorised staff can see your information. Refer to our Terms & Conditions at www.imoko.com.

In the event you require treatment as a result of the **MAiHEALTH™** health checks, you will be notified immediately. Your family Doctor and other health professionals involved in your care will also be notified of any treatment you receive through the programme.

In order to ensure the best and safest care for you, there may be times when we require additional information from your GP or other healthcare professionals involved in your care. Additional information may also be obtained from national databases (e.g. NIR).

From time to time, the **MAiHEALTH™** team may add information to your health record and share such information with other health professionals involved in your care, as well as the Independent Practitioner Association (IPA). We may also use, and may allow others to use the information we collect for health planning, statistical and educational purposes.

The Health & Disability Commissioner's Code of Rights applies to the **MAiHEALTH™** health checks. For information about your rights visit www.hdc.org.nz or call 0800 555 050.
